

Intrauterine Insemination Catheters

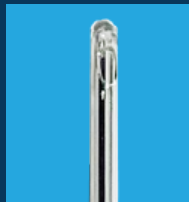

- Catheter tip is rounded and beveled for patient comfort
- Regular full length: 21cm with 2 holes at the distal end
- Mini and Mini Curved length: 21cm with a single hole at the distal end

022724 Intrauterine Insemination Catheter (Mini)

022725 Intrauterine Insemination Catheter (Mini Curved)

022723 Intrauterine Insemination Catheter (Regular Straight)

Clear Shapeable Intrauterine Insemination Catheter

- Made with superior memory material to easily form the tip
- Clear shaft reduces possibility of uterine spasms and retroflow by removing any visible air bubbles
- The alignment of the side hole and flat side of the connector allows the catheter to point towards the left or right fallopian tube ostium for directional injection

TMI 1297 Intrauterine Insemination Catheter (Clear Shapeable)

All About Thomas Medical Catheters

Thomas Medical HS Catheters are used in HSG, SIS, and SHG procedures. **Every catheter is proudly Made in the USA and individually hand-tested.**

Flexible & Shapeable HS Catheters

- Smooth tip for optimal patient comfort
- Concentric balloon seals internal os to prevent leakage
- Shapeable Catheter has an embedded stylet for cases of stenosis or ante-retroflexed uterus

All Catheters are GAMMA Sterilized

TMI 1154 Flexible HS Catheter 5Fr

TMI 1155 Flexible HS Catheter 7Fr

TMI 1185 Shapeable HS Catheter 5Fr

TMI 1187 Shapeable HS Catheter 7Fr

Miller Advance HS Catheter

- The soft catheter tip and slender shaft reduce the need for dilation
- The sheath is shapeable to ensure maximum patient comfort and effectiveness

TMI 2002 Miller Advance HS Catheter 5Fr

Steen Open-Tip Catheter

- The balloon is on the distal tip to provide a clear view of the uterus while performing an HSG or SHG procedure
- The open distal end allows a forward injection into the uterus
